Company's Overview Based on Recent Concall and Performance:

Alkem Laboratories has demonstrated robust growth and strategic foresight, positioning itself as a leading player in the pharmaceutical industry. The company has consistently outperformed the Indian Pharmaceutical Market (IPM) across key therapies, including gastrointestinal, neuro/CNS, anti-diabetic, respiratory, and gynaecology, with a focus on chronic segments. Alkem's domestic business, contributing ~70% of total revenue, has grown at a CAGR of ~12% between FY18-24, driven by its extensive sales and distribution network, which covers 85%+ of prescribers. The company has invested in scaling its chronic portfolio, aiming to increase its contribution to 20% of revenue from 17% in FY24. Notable brands like Dapanorm and Dapanorm Trio have scaled rapidly, achieving a topline of 450+ Mn within four years of launch. Additionally, Alkem's leadership in the Trade Generics (TGx) segment, supported by a dedicated team of 650+ field force and 3000+ authorized stockists, is expected to deliver double-digit growth in the next five years.

Internationally, Alkem has established a strong footprint, with 30%+ revenue contribution from global operations. The US market remains a key focus, contributing ~69% of international sales, despite challenges like price erosion. The company is leveraging its differentiated technology platforms, including biosimilars and BioCDMO, to drive growth in emerging markets and developed geographies. Enzene Biosciences, a subsidiary, is pioneering end-to-end continuous manufacturing systems, enhancing productivity and quality while reducing carbon footprint. Alkem's US manufacturing facility, expected to operationalize by late FY25, will further strengthen its presence in developed markets. The company has filed 179 ANDAs and 2 NDAs, with 154 approvals, showcasing its strong R&D; capabilities. Biosimilars out-licensing agreements in markets like the UK, Switzerland, and Brazil further highlight its global expansion strategy.

Alkem's financial performance reflects its strategic initiatives and operational efficiency. In Q3FY25, the company achieved revenue of 33,743 Mn, with a YoY growth of 1.5%, and EBITDA margins improved to 22.5%. For 9MFY25, revenue grew by 0.9% YoY to 98,208 Mn, while EBITDA increased by 15% YoY, driven by higher gross profit margins of 64.5%. R&D; expenses rose to 4,035 Mn, underscoring its commitment to innovation. The company's net profit for 9MFY25 grew by 23.8% YoY to 18,596 Mn, supported by a healthy balance sheet with 47.0 Bn in net cash. Alkem's ability to outperform the IPM in multiple therapies and its focus on scaling high-growth segments like chronic and TGx highlight its resilience and growth potential.

Looking ahead, Alkem is well-positioned to capitalize on emerging opportunities in the Indian healthcare landscape, which is expected to triple to \$450+ Bn by 2030. The company's targeted investments in biosimilars, injectables, and medical devices align with broader industry trends. Its aspiration to become a global partner of choice for BioCDMO innovators and its focus on integrated ecosystems across key disease areas will drive sustainable growth. Alkem's strategic diversification, strong R&D; capabilities, and operational excellence provide a solid foundation for scaling its domestic and international businesses, ensuring long-term value creation for stakeholders.
